

# Bryerstone PDF Editor

## Tutorial & Quick Start

**In 30 seconds:** Upload a PDF → choose a tool (**Text, Check, Sign**) → place annotations → click **Download PDF** to export your edited file.

This guide is designed to match your production app at **pdfeditor.bryerstone.com** and help new users succeed on their first try.

### 1) Upload a PDF

Click **Choose File** (or the upload field) and select a PDF. The document will render on the page, and page navigation buttons will activate.

#### Screenshot 1 — Upload a PDF

Place a PNG screenshot here (export from your browser).

*Tip: Store screenshots under /srv/mlos/pdf\_editor\_product/frontend/dist/tutorial/*

### 2) Navigate pages

Use **Prev** and **Next** to switch pages. Your page label updates as you move through the PDF.

## Screenshot 2 — Page navigation

Place a PNG screenshot here (export from your browser).

*Tip: Store screenshots under /srv/mlos/pdf\_editor\_product/frontend/dist/tutorial/*

## 3) Add Text & Dates

Click **Text** to place a text box, then type. Click **Date** to stamp a date field. Drag to reposition. Use **Select** mode to adjust items.

## Screenshot 3 — Text & Date tool

Place a PNG screenshot here (export from your browser).

*Tip: Store screenshots under /srv/mlos/pdf\_editor\_product/frontend/dist/tutorial/*

## 4) Add check marks

Click **Check**, then click where you want a checkbox or checkmark overlay. Use **Select** to move/resize if needed.

## Screenshot 4 — Check tool

Place a PNG screenshot here (export from your browser).

*Tip: Store screenshots under /srv/mlos/pdf\_editor\_product/frontend/dist/tutorial/*

## 5) Sign (draw a signature)

Click **Sign** to enable drawing mode. Use your mouse or finger to sign. Use **Clear Sign** if you want to start over.

## Screenshot 5 — Sign tool

Place a PNG screenshot here (export from your browser).

*Tip: Store screenshots under /srv/mlos/pdf\_editor\_product/frontend/dist/tutorial/*

## 6) Delete, Clear Page, Undo/Redo

**Delete** removes the selected annotation. **Clear Page** clears annotations on the current page. **Undo/Redo** steps backward/forward. **Undo Clear** restores a cleared page when available.

### Screenshot 6 — Editing controls

Place a PNG screenshot here (export from your browser).

*Tip: Store screenshots under /srv/mlos/pdf\_editor\_product/frontend/dist/tutorial/*

## 7) Download your edited PDF

Click **Download PDF**. The app embeds your annotations into the PDF and downloads the final file.

### Screenshot 7 — Download PDF

Place a PNG screenshot here (export from your browser).

*Tip: Store screenshots under /srv/mlos/pdf\_editor\_product/frontend/dist/tutorial/*

## Troubleshooting

Issue	Fix
Nothing happens after upload	Refresh the page and try a different PDF. Ensure pop-up/downloads aren't blocked.
Signature won't draw	Click <b>Sign</b> again to re-enable draw mode. On mobile, use your finger on the PDF.
Items hard to move	Click <b>Select</b> mode, then tap/click the item once to select before dragging.

## Contact support

Need help? Email **support@bryerstone.com** or visit the tutorial page in-app: [pdfeditor.bryerstone.com/tutorial](http://pdfeditor.bryerstone.com/tutorial).

If you want this PDF to include real screenshots, export your screenshots as PNG and place them at: `/srv/mlos/pdf_editor_product/frontend/dist/tutorial/` Then either rebuild this PDF (using a script) or replace the placeholders in your preferred editor.
